

# Visy Access Gate in practice

Visy Access Gate controls all checkpoints where vehicles and visitors need to be identified and guided. Automated recognition processes and area guidance complement production, ensure well-functioning transactions, and enhance area safety and security.

Arriving vehicles and people are identified automatically. Identification methods are chosen as needed.

Visy Access Gate guides vehicles and people individually to target positions.

Visy Access Gate is connected with industrial production control and automation systems to work as part of the production process.

## VISY Smart Gate and Access Control Solutions

Visy is a Finnish IT company founded in 1994, specializing in vision technology and gate automation solutions.

Developing license plate recognition and access control solutions have been a cornerstone of operations since the company's inception. With Visy systems, customers identify and manage all traffic of vehicles, people, and cargo in industrial facilities and container terminals all over the world.
