

AI-based access control solutions for secure gate automation

Visy's OCR (Optical Character Recognition) solutions are used by cargo terminals worldwide to track and manage the flow of cargo and vehicles. Our in-house computer vision software recognizes license plates, container codes, trailer IDs and many other identifiers of all cargo flowing in and out of the facilities.

As a software company, Visy is a future-proof and agile partner for all your smart gate, access control, and terminal automation needs. Our solutions are not limited to industry-leading accuracy in standard OCR tasks; our in-house AI and software teams take care of your unique needs easily – be it a new kind of marking to recognize or a new third-party integration. We are up to the task.

The Visy Platform covers every part of a facility where automatic identification, guidance, and tracking of cargo, vehicles and people bring new opportunities to streamline operations.

Benefits of Visy Systems

- ✓ Minimize unnecessary idling by reducing turnaround times and traffic congestion
- ✓ Optimize existing automation systems to enhance process reliability and efficiency
- ✓ Improve safety by removing people from hazardous environments
- ✓ Ensure employee wellbeing with better working conditions
- ✓ Reduce theft and fraud
- ✓ Improve transparency of operations
- ✓ Automated compliance checks ensure adherence to regulations

Visy's OCR solutions digitize cargo markings and features to improve the management of the traffic flow.

VISY

Smart Gate & OCR Solutions

Visy is a Finnish IT company founded in 1994, specializing in vision technology and gate automation solutions.

From day one, our cutting-edge access control solutions have been at the core of our business. With Visy systems, clients gain full visibility and control over vehicle, personnel, and cargo movement – ensuring seamless operations and enhanced security at industrial facilities and container terminals worldwide.
